XSEED
FOUNDATION FOR LIFE

THE 5-STEP TEACHING METHOD

Since children learn better when they experience practically the knowledge that they receive through class teaching, the VITS School's focus shall be on imparting experiential and research-based learning where every child is given due attention.

Thus, apart from the curriculum being highly flexible and analytical, the VITS school focus will be on simulating brains so as to ensure that children develop the ability to think creatively.

Besides high quality teachers, the knowledge will be imparted through multimedia such as power-point slides through LCD projector and with latest relevant software's with video and audio inputs for effective learning.

AIM

Clarify the outcome of every lesson so students know beforehand what they will learn.

ACTION

Perform an activity to experience concepts first-hand & understand their use and application in real life.

ANALYSIS

Reflect on the experience & ask probing questions to uncover and understand the concept further.

APPLICATION

Practice solving real world problems in the workbook to solidify understanding and build skills.

ASSESSMENT

Get real-time feedback across conceptual understanding, applied thinking & english language fluency in order to improve performance.
